# INCLINE TRAINER

- MODEL › FMTK7506P  
 FEATURE › Incline Trainer shown with workout TV  
 OPTION › FMTK7256P with basic console

Top View

**DRVS™ – Direct Rear Velocity System:** The FreeMotion Incline Trainer is driven by a one-of-a-kind, rear-drive motor system that delivers quality performance with the most comfortable deck cushioning. By positioning the motor at the back, the running surface has a smooth, spacious feel while making it easy to access the motor during routine maintenance.

## FEATURES AND BENEFITS

**Motor** › DRVS™, Direct Rear Velocity System; a self-cooling 5.0 HP high torque AC speed control motor, positioned in the back of the machine for a smoother running surface and easier maintenance.

**Cushioning** › By combining BioStride® urethane deck isolators and the DRVS motor system, users experience additional cushioning as the deck is able to give with every foot strike.

**QuickTouch™ Incline** › Adjust incline from -3 to 30% by simply touching a button or scrolling in 0.5% increments.

**Maintenance-free Belt** › 22" x 60" (56 cm x 152 cm), 2-ply belt requires no lubrication for years of smooth, consistent use.

**Lift Motor** › Specifically designed for the Incline Trainer, this AC lift motor provides 1500 lbs. of lift force for smooth, consistent deck movement and stabilization.

**Deck** › Double coated with phenolic resin on both sides of the deck to last twice as long when flipped during general maintenance.

**Serviceability** › The unique DRVS system makes routine, preventative maintenance easy because the hood is positioned at the back of the machine.

**Heart Rate** › Pulse information can be displayed on the console via contact sensors or Polar® compatible wireless telemetry.

## SPECS › FreeMotion Incline Trainer

MODEL FMTK7506P (TV Console), FMTK7256P (Basic Console)

<b>Dimensions (LWH)</b>	80" x 37" x 78" (203 cm x 94 cm x 198 cm)	<b>Maximum User Weight</b>	350 lbs. (159 kg)
